

# Bible Reading, Part 2: Discussion Questions

## Opening

What are some of the most difficult obstacles we face when we try to read and understand the Bible?

## Going Deeper

1. Of the four practical elements mentioned in this section – A Study Time, A Study Method, A Study Group and Study Resources – which element could you begin first to work on, in order to deepen your understanding of the Bible?
2. Read Psalm 1:1-2. Why does the Psalmist believe we should meditate on God's words "day and night"?
3. What Bible Study method works for you? If it is different than the one described in this Session, share it with the group. Perhaps it will work for someone else.
4. Read Acts 2:42-47. List the various things that the early church members did to grow in their faith. Why was it important that they practiced these things together, in community?
5. Why is it important to join with others to study the Bible?
6. Share with the group some study resources that you have found especially helpful.
